#### **ELECTRIC SURVEY RESULTS 2003**

Under the guidelines of Illinois Administrative Code 411, the ICC adopted a yearly customer survey requirement for electric utilities. The initial survey results serve as a benchmark. Utilities provide the results in their annual reports to the Commission. To review the entire survey or to see more information from the electric reliability report submitted by utilities, refer to the electricity link on the ICC home page.

Shown below are customer responses to some key questions from the survey conducted during the fall of 2003.

### Rating Questions (1-10 scale 10 being the highest) Results expressed as the mean

Rating Question (1-10 scale 10 being the highest) results expressed as the mean

Providing reliable electric service

Company	Residential		Commercial	
	2003	Benchmark	2003	Benchmark
